Text Response Summary

Comments on today's presenters:

Response
Excellent
excellent presentation
GREAT PRESENTATION
Dr. Schweon was excellent. Very practical approach and clearly good with staff.
This would clearly have been very beneficial for our CNA's to view.
Excellent presentation and interactive session.
Steve did a wonderful job and made the presentation very interactive.
Would love to have the slides for an inservice for our staff
Excellent way to drive the importance of a walking round and catching issues in the moment--- pictures always worth a thousand words. Staff more likely to not want their 'mistake' in picture form and will appreciate those 'educational moments'.
Great interactive presentation! Enjoyed Steve's sense of humor.
Very good. New information and easy to understand
very informative
Great job very interactive
Excellent presenter!!
Excellent presenter with great information
Excellent session- best one yet.
Interactive, enjoyable
All staff can relate
Today's presentation was excellent I plan on showing this to our Nurses and get the OK from our Administrator to take pictures where resident specific information will not be compromised and use to improve our resident outcomes and staff education at this facility.

AHRQ Safety Program for Long-Term Care: HAIs/CAUTI Event Evaluation Summary

From the information provided during this event, please describe what you plan to do:

Response
The type of rounds and monitoring process sounds very interesting and our facility will consider changing our current process.
walking rounds
START WALKING ROUNDS
including others in rounds; improved communication style
I plan to start making walking rounds.
Take pictures of items found on walking rounds and provide an educational opportunity for staff
Walking rounds implemented
We will start walk rounds at our facility
walking rounds
We will be doing rounds with all frontline staff and educating in place
As above
Do rounds on long term foley cath.

The one thing about this event that I would like to see improved is:

Response
staff participation
picture quality
Could not see all of pictures
Some of this information is too basic.
Everything about today's webinar was fantastic
Quality of pictures
The handout provides before the presentation.
availability of power point print out prior to session
Excellent as is maybe longer time for questions and answers

AHRQ Safety Program for Long-Term Care: HAIs/CAUTI Event Evaluation Summary

The one thing about this event that I liked most is:

Response
Topic and approach
Ideals with rounding
The detail and pictures
the information that is given
LIKED THE PHOTOS - GREAT IDEA
Down to earth and very easy to take out into real practice.
graphics
Interactive photo's for learning
The pictures
several scenario for clinical use
Interactive session with slides
handouts
Interactive
Interactive and it tested the ability to pick out what was wrong.
"Real world" examples and tips on how to deal with staff on areas of improvement.
Very informational
The interaction with the pictures
is pointing things out and education to the staff
interactive
The presenter captured the audience.
Examples and discussion
Interactive/Pictures
Can use in everyday practice with all levels of staff
Visual learning and how it can be put to use.
stimulated me to adopt new procedures.

AHRQ Safety Program for Long-Term Care: HAIs/CAUTI Event Evaluation Summary

If you are participating in another national project, in what ways can we integrate across the projects to increase efficiency and effectiveness?

Response
more than one time to attend
C-Diff same rounds type of rounds or combine rounds

What content or topics would you like to have presented in an educational session or training in the future?

- No responses.
